

Zeal Technology®

Activated Reduced Liposomal Glutathione

Next-generation antioxidant delivery — sustained, stable, science-backed.

12-Hour Sustained Release

Allergen-Free · Non-GMO

Plant-Based · Clean Label

What is Glutathione?

Glutathione is the body's "Master Antioxidant" — produced in every cell and central to immune defense, liver detoxification, DNA repair, and cellular energy. It neutralises free radicals, recycles vitamins C and E, and protects neurons from oxidative damage. Without adequate glutathione, the effects touch everything from immunity to brain function and vitality.

Why Standard Oral Glutathione Falls Short

- **Destroyed before absorption:** Most glutathione breaks down in the GI tract before reaching cells.
- **Too short-lived:** Standard forms provide only 2–3 hours of activity per dose.
- **Unstable on shelf:** Liquid and oxidised forms degrade rapidly, losing potency before use.
- **Synthetic excipients:** Many products use artificial fillers and soy-derived carriers.

Zeal Technology® Changes Everything

Zeal Technology® is a clinically backed, plant-based liposomal delivery system that encapsulates activated reduced glutathione (GSH) within a phospholipid bilayer derived from sunflower lecithin — mirroring the structure of your body's own cell membranes.

The liposomal shell protects glutathione through digestion, escorts it past the gut wall, and delivers it directly to cells. The result: superior bioavailability, 12-hour sustained activity, and shelf-stable performance — rooted in Ayurvedic tradition and modern science.

Key Benefits of Zeal Technology®

- **12-Hour Sustained Release**
Single dose — no repeat dosing
- **Activated Reduced Form (GSH)**
Biologically active — works immediately
- **Superior Cellular Delivery**
Bypasses digestive breakdown
- **Allergen-Free, Plant-Based**
Sunflower lecithin — soy-free, non-GMO

Zeal Technology® Glutathione

Head-to-Head: Why Zeal Wins

Activated Reduced Liposomal Glutathione · Powered by Zeal Technology®

Feature	Zeal Technology® Glutathione	Standard Glutathione
Duration of Action	Up to 12 hours sustained release	Only 2–3 hours per dose
Delivery Format	Stable liposomal powder — shelf-ready	Unstable liquid or oxidised forms
Bioavailability	High — survives digestion intact	Low — largely degraded in gut
Label Appeal	Plant-based, clean-label Ayurvedic-inspired	Often synthetic with added excipients
Shelf Stability	High — extended shelf life	Prone to oxidation & degradation
Allergen Status	Allergen-free, Non-GMO Sunflower-sourced	Varies — often soy-derived

What This Means for Neuro Nourish®

Every scoop of Neuro Nourish® delivers Zeal Technology® glutathione in its activated, reduced form — protected, bioavailable, and effective for a full 12 hours. Where other supplements include glutathione as a checkbox, Neuro Nourish® delivers the form your cells can actually use: allergen-free, sunflower-sourced, and batch-tested for purity.

Product Specifications

- Form:** Liposomal powder
- Glutathione type:** Activated reduced (GSH)
- Delivery system:** Zeal Technology® liposomal
- Lecithin source:** Sunflower (allergen-free)
- GMO status:** Non-GMO
- Min. pack size:** 1 kg
- Storage:** Cool, dry place
- Custom blends:** Available upon request
